Maybe even better than free.

Just upload the file you want to share with your friends and we send you a download link to your file. Any file in any format can be uploaded and downloaded for free. Keep your files private, or send your download links only to friends or family. The cost of that data transfer is covered by your internet service or the data plan on your phone. File is free to use with no gotchas and no hidden fees. You don't need any special software installed to be able to download your files. filehosting provides an easy possibility for you to send large files to your friends. This is easy, fast and reliable filehosting! You don't need any kind ofpremium-accounts. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. You cangive this download link to your friends by mail or instant messenger. We have no file size limit. No account or credit card is required to get started. You decidewho you want to share your files with. Unfortunately, we can't make that part free. It is also allowed to link to the download page from websites andcommunities. Simply upload your file and share the link. So try our free and simple filehosting service now. Our service is completely free for everyone.Alternatively you can choose to share your download links on blogs, forums and social networking sites. Using file, you can circumvent those limits withoutpaying to upgrade your team chat service. If only we could, we surely would! On the other hand, using file can actually save you money. Files can bedownloaded from any computer from our high speed servers. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, manyteam chat apps have limits to the size of files that can be transferred within their apps. There are no restrictions on the number of times a file can bedownloaded. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Your wallet will be none-the-lighter! Just sowe're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers, then from our servers to yourfriends device. You can upload any type of file (movies, music, documents, images, zip files and more).
