Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with breeze at by ecoquest manual . To get started finding breeze at by ecoquest manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

breeze at by ecoquest manual

Lightning produces ozone, as well as positive and negative ions which cleanse the air naturally. Rain helps bring the ozone and ions closer to the earth's surface. They are then attracted to atmospheric contaminants that are either removed from the air and attached to grounded objects or are oxidized. Installation is as follows 1. Unplug the Breeze 2. Remove the rear filter door see previous page. 3. Fully insert the purifier plate between the guides until it stops. 4. Purifier Plate Remove the rear filter see page 5. Carefully remove the Ecotech purifier plate from the card cage by grasping the middle of the edge nearest to you, See page 6 for purifier plate location and slowly pull it straight out. Unplug and inspect the unit for any loose connections. If your unit fails to operate properly after performing troubleshooting, contact your EcoQuest Dealer for further assistance, contact EcoQuest at the address located on the front of the manual, or visit www.EcoQuest.com for additional technical support. WARRANTY INFORMATION This product is of solid state construction and is warranted by EcoQuest International, 310 T. Fresh Air Purifier, Breeze, Living Air Classic XL15, Living Air Flair, EcoBox, Fresh Air To Go, Buddy, Focus, Ozone Blaster, Eagle 5000, Living Water and Laundry Pure, Parts, Repair, ActivePure RCI Cells, Ozone Plates Much better than my old Classic XL15, quieter and stronger, too. Will recommend to friends and family. God Bless and keep up the good customer service! Unit came in 5 days and works great. Very friendly customer service. Will buy again! Reload to refresh your session. Reload to refresh your session. It's hard to believe that an air cleaner would actually pollute the air, but some of the most popular models do just that. EcoQuest air cleaners emit large amounts of ozone, a lung irritant that can trigger asthma attacks. The manual also suggests airing out the room before going back into it. It's because of deceptive marketing claims made as part of a pyramid scheme. People continue to fall for the scam, but once they start using the air cleaner at home, they realize they've been had. They were both having the early symptoms of an asthma attack. By the third day, I also had some chest pain, and I don't have respiratory problems. My son could not quit coughing after we had the machine in our house for 3 days. When we were out of the house, he was fine. I don't know which is worse, my kids having asthma attacks because of secondhand smoke or my kids having asthma attacks because of the Ecoquest Fresh Air." The Ionic Breeze also emits ozone and is not recommended for allergy sufferers. On infomercialscams.com, one consumer writes I made the mistake of trusting David Oreck and his ad I'm trying to get a refund and trying to get them to stop taking money out of my bank account. I'll NEVER buy another product that has the name Oreck on it. As the collection plates on the Oreck XL become full, the air cleaner loses efficiency, and the plates must be emptied. HEPA filters, on the other hand, need to be replaced only once every five years, and they're guaranteed to capture 99.97% of household allergens. Unlike the Oreck air cleaner, HEPA air purifiers do not emit ozone. Also be wary of "electronic" air cleaners, as they may emit ozone. If you suffer from allergies or asthma, trust HEPA air purifiers to safely and effectively remove allergens from your home. Went to Ecoquest.com and didnt see a download for this model.

Also went to the UK site suggested by another poster and the PDF manual does not seem to be working. Help would be greatly appreciated. Thanks!!!I dont see anywhere for the downloads. Hope this helps. Login to post The Breeze AT is in the Owners Manuals list as suggested by Guru but the page is not active. I have searched. The Breeze is no longer available in our product line, but it sounds like your problem is an easy fix.I need the owners manual and whatever maintenance parts that are required. Where can I go to get these items If that person doesnt respond to your inquiry, call Customer Service at 8009892299 and let them know. I have an owners manual that I can scan and email to you.I can send it to you if you email me at stevelam at ecobusiness.com.Any automotive store carries them.The 250 v is the norm. The fuse protects against amperage overload not voltage. They come in tins of assorted or specfic in fives. Good luckNevertheless, this machine generates ozone, which is an upper respiratory tract irritant. It is absolutely vital that you follow the manufacturers instructions to the letter when operating it. Personally, I would never want to be in the same room as a working ozone generator and I know of at least one ozone generator where the instructions specifically tell you to keep out while its working.If you no longer have the manual, you can download a copy at www.ecoquest.com click on the DOWNLOADS tab, then on OTHER on the green bar. The Breeze AT is in the Owners Manuals list..You can download the manual directly at Obviously you need the manual because there is a question. Mind sharing the question Dutch On the Ecoquest Breeze you should plainly see the obvious pull tab, at the top of the back filter panel, after putting the filter back in place.The Breeze AT is in the Owners Manuals list as suggested by Guru but the page is not active. I have searched. Answer questions, earn points and help others.

We are not aware of test results for these models using the UL 867 test protocol required by the air cleaner regulation. Until the testing required by the regulation is completed, we do not know if the ozone emitted will meet the 0.050 ppm limit specified in the UL 867 Standard. Exclusion from this list is not to be construed as endorsement by the California Air Resources Board. Induct systems and other nonportable ozone generators are generally not listed here, with a few exceptions, but may generate potentially harmful levels of ozone. In this year for the same period of time, only 510 kids were absence. The difference in the quality of air in kindergarten was noticed by both employees and parents of children. The air became different, if you more often ventilate and turn it on, the climate in the apartment is generally perfect. We will be buying one for our parents too. Advantages Well cleans and eliminates odors. The air has become completely different. Wellbeing is much better. Of this price category we advise to choose Ecoquest, Others may have more features, but no Reliability. Enjoy reading our tips and recommendations. We value your privacy. Unsubscribe easily. Lily of Apple Valley, CA For longtime doubted the need for purchasing but still, in the end, bought the unit. I DONT have any objective control devices for the Ionic composition of the air. But after turning on the ionizer, after a while, the air in the room became softer or something, This is difficult to explain but it feels very good if you move from room to room.

<http://pillangovendeghaz.com/images/94-cadillac-deville-manual.pdf>

At first, seemed that the windows were open, but it was surprising that there was no temperature difference, later I realized that the windows were closed and the freshness effect was not caused by street air but by the ionizer. We dont turn the ionizer off at all as its purifiers the air in the house. It was a classic model. Simple but effective air purifier. But the way company managed customers was horrible at that time. I think mostly, because they were a global network. And you wasnt able to find anyone responsible for support and doing it in right way. I use to have a lot of issues with the support guys for spare parts and service back in 20122013. Have to say that I like the technology they use. You cant find similar no filter system among thousands offers even now after years. Ive got my Fresh Air from Ecoquest purifiers website. And Im glad to notice that things been changed. They

got right approach to customer, good price and full support. Cant complain now. And if you think to get one, I would recommend. This machine are powerful enough to clean the air in your house, quiet enough for you to sleep near it in a bedroom, and not so expensive like other branded air purifiers. That it's reason to place several throughout your home. Ionisation is good for removing fine particles such as dust and smoke. Works fine. Thanks. They never shipped the item to us and every time I contacted them the answer was always the same they promised the item would arrive within days which never happened. After several phone calls and weeks of waiting without any proof the item was indeed shipped to us we decided to contact our credit card company to get a full refund. I would highly recommend staying away from this company. This is the first time I order something, pay for it but never receive the item. So if you are reading this stay away from this company!!! No surprisingly I am not the first person who shares the same complaint about them on this platform. Very disappointed.

I love the Vollara products and decided to go they EcoQuest. Bad idea. I am contacting my cc company for a full refund. Delivery time was fast. This was our second air purifier for the same model. First, we placed the unit in the head of the office. He smokes a lot and this air purifier helps to fight the smell of nicotine. The second air purifier will be placed at the allergic house as it copes with pollen and smoke. They do not stand behind their product. I purchased RCI cells from this company to replace the ones that burned out in my air purifier. They lasted two months. I requested replacements. It's been six months and I'm still waiting. I would not recommend this company to anyone. I have no idea how to get my money back. Complete thieves. Stay away from this company. User Agreement, Privacy, Cookies and AdChoice Norton Secured powered by Verisign. As with any other homecleaning appliance, the filter and other parts eventually stop working after extended usage. If your Ecoquest air purifier makes a loud rumbling sound during operation, or wont power on at all, you need to replace and clean several internal parts to repair the device. Turn the air purifier around so the rear plate is visible and facing you. Grip the purifiers power cord and unplug it from your outlet. Grab the plastic locking thumbscrew at the topright corner of the rear plate. Turn the screw counterclockwise until it pops forward. Repeat the process with the thumbscrew at the topleft corner to unlock the rear plate. Hold

the topleft and topright corners of the rear plate and pull the plate toward you. Set the plate aside to reveal the lint screen inside the Ecoquest purifier. Turn the thumbscrews that are positioned at the right and left sides of the plastic lint screen counterclockwise. Grip the top of the lint screen and pull it up slightly until it unlocks from the purifiers case. Pull the entire screen toward you and set it aside. Locate the flat purification plate positioned near the middle of the purifier. Hold the edges of the plate and slide it toward you. Set the plate on a flat surface. Mix together a solution of equal parts alcohol and water in a bowl.

Dip a soft cleaning brush into the solution and scrub the purification plate clean on both sides. Unplug the short cable connected to the port at the bottom of the purifier. Follow the cable to the RCI cell sitting near the top edge of the purifier. Pull the cell toward you and discard it. Set the replacement Ecoquest cell on the plastic shelf near the top edge of the purifier. Plug the new cells cable into the port near the bottom of the purifier. Push the cleaned purification plate into the rack at the middle of the purifier and place the new lintscreen filter onto the purifier. Twist the thumbscrews back into position to lock the lint filter. Replace the rear plate and twist its thumbscrews into position. **Warnings** Never place an Ecoquest air purifier near a source of heat such as a water heater or fireplace, as heat may damage the filters. His articles have appeared on Metalunderground.com and many other websites. Arthur attended the Great Falls College of Technology and studied both computer science and creative writing. WSBW 5.

0 out of 5 stars I did not have to do a thing other than use the stand offs as bushing to adjust the shaft length for a perfect fit. Thank you. WWIt had no installation instructions as promised. I contacted the seller and the response was that I hadnt requested any instructions nor told them what model it was to be used for, neither of which was asked when I placed the order. Even though I was able to install the fan and it works great, I was disappointed at the failure to deliver the promised instructions and put off by the callous response from the seller. I came away feeling shortchanged, yet grateful that I was able to fix my machine. Very satisfied with part but not attitude of the seller. Now noise or vibration. How about using a photo of exactly what you are selling instead of a picture picked up from somewhere else. The motor received will probably not last as long as the original but I didnt have time to return it. The next thing that stopped working was the UV lamp which I found the replacement part on Amazon and it was easy to install. Now I had to replace the fan motor. I ordered a new fan motor from Amazon it was not exactly like the Display picture but still worked for my machine. It was easy to install the only difference with the new fan motor was the wire connections are to the side instead of towards the back, also the fan motor post for the blades on the original is tapered at the end and on the new fan motor blade post it is not so it was slightly difficult getting the fan blades back on. Now machine is back to working 100%. Shipping took a full week. Seller supplied all kinds of small hardware, and although shipped all loose in box with motor, it did come in handy. After finding proper pieces to use, I mounted new motor. I was not able to set motor far enough into box to install grille, but it runs okay once adjusted so as fan blades do not hit on opening. Seller had warned about kit being universal.

Grill cannot go on unless you somehow modify mounting bracket. Shaft is long for multiple uses and mounting dimensions cause motor to sit forward in box. Speed is adjustable with knob on front panel, even though running faster than original. All said and done, this is one of few motors to be found to replace the original. Since a new ionizer is several hundred dollars, this has saved a lot of needed cash. Be aware of this when buying. Only complaint no directions. They would be helpful. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. The most controversial type of home air purifier uses ozone oxidation. This page discusses the health risks of ozone emitting air purifiers for routine long term household use. The oxygen that we need in the air we breathe has molecules of two oxygen atoms O₂. Ozone accumulates in home air. In the absence of O₃ generators, indoor levels are much lower than found outdoors. Visitors complement the home owner on the Ozone's best application is in deodorizing hotel rooms. When the room is odor free, staff returns, turning off the machine. Do they wait until the room is completely aired out before you check in? The Ecoquest product line falls in this category. Particulates are not removed from the air, since there are no filters. Copyright 2005-2019. However, the 120FA and 1.5 models have been long ago discontinued and Vollara no longer supports these models with parts and repairs. But don't worry, we still do. In fact, we've gone out of the way to help our customers keep up and running with their old dependable purifiers. This guide is one example of how we help our customers with their systems. We also answer questions and source our own parts when they are no longer available. How does it work? Here you'll find a down-to-earth, plain English description of what your purifier does.

Inside this machine, you'll find four or five different methods depending on the model of purification to make your home or office air cleaner. They are:

- 1 Ozone Production from the Ozone Plate or Purifier Plate. Ozone, when released into the air, combines with odors, gasses and chemicals in the air reducing them to odorless and harmless materials. The ozone combination causes a chemical reaction that results in reducing them to oxygen and water. A little ozone is a good thing, just be careful not to use too much. It can be an irritant to some people some much more than others. A good rule of thumb is to set the unit so that you can smell just a little when you walk into the room, but don't notice it after a few minutes. If you can smell it all the time, it may be set too high. Use the square footage guide on the LCD panel as a starting point and adjust as needed.
- 2 RF Ionization from the energized antenna. The RF ionizer uses a radiolike signal that alternates to create a signal that gives all the material floating in the air to take on either a positive or negative charge as it works. When a piece of dust or other particle with a positive charge comes close to one with a negative charge, they are attracted together. When enough get together, they have enough weight to fall from the air to the floor where it can be vacuumed and removed.
- 3 Needlepoint Ionization. Depending on the model, you may also have a type of ionization that emanates from a small needlepoint located in the front of the unit. This kills any bacteria that may be present in the air at the time. Although these units are not typical air filters a certain amount of filtering does take place and when small bacteria get through, they are killed, decreasing odors and possibly sickness in the process.
- 5 Target Plate or RCI Plate. The target plate in this unit has undergone several evolutionary changes over the years. Originally, it was a very dense metal screen treated with chemicals.

NOTE If you still have one of the above type target plates, you need to replace it as it is no longer working and may harm your machine. Finally, a screen with a metal holey center was introduced. This allows for more air flow and a larger area for addition of the chemical. This shows up as a green or white powdery substance on electronic connections. More on this later. The combination of the types of purification happening inside and outside your unit make it an excellent choice for purifying the air in your home or office. It is safe, simple, and effective. Here is a list of advantages the company lists for this model in the owners manual: Eliminates smoke, odors, and tobacco smoke. Sanitize feature kills mold, mildew, and bacteria in unoccupied spaces. UVC light helps kill airborne germs as they pass through the unit. Removes odors from your home, office, car, boat, RV, etc.

Improves the quality of air indoors Helps control additional dust and dander when an optional EcoHelp filter is properly installed. Customizable to your environment using either the included remote or the controls on the front of the unit. Some have had them for as many 10 years and they re still working. But this will not happen if you do not maintain your unit. It needs REGULAR care to last that long. Here s how you keep in top working condition Clean Monthly If your unit is running properly, it should remind you to Perform Cleaning about every 30 days. Whether it tells you or not, you should do this monthly. Here s how you do it Turn the unit off and unplug it for all cleaning procedures. 1 Vacuum the back lint screen. This screen is to keep out the larger dust that could clog your purifier. Keep it clean to allow the system to work properly. When it appears to be worn out, or not working well the carbon doesn t always keep working, replace it. If you have a carbon back filter, do not wash it. Just vacuum it off. 2 Vacuum the inside.

Just vacuum what you can get to, looking for the larger dust deposit. Clean where you can using a crevice tool if you have one. 3 Clean the purifier plate. Clean it well and let it dry completely before replacing it. Usually a towel dry and maybe some time with a hair dryer will get it dry enough to replace it. 4 Clean the RCI Target Plate. Since this plate has a chemical on it, you only want to remove the extra dust on it, not the entire coating on the metal plate. If you notice that the material is starting to come off the metal plate, it may be time to replace it. You can also turn the target plate over each month as the metal is coated on both sides. 5 Vacuum the front and rear grill openings. Again, just looking to keep the dust off of as many surfaces as possible. A damp cloth can also be used to wipe the unit down to keep it dust free. Do the above every month for best results. Perform As Needed Sometimes the fan blade will get very dusty and that reduces its efficiency. You can remove the four screws that hold the front grille in place and remove it. A bad starter could blow a good bulb. Troubleshooting your unit We ll start by giving you the troubleshooting guide that is included with the manual. It will answer some of your questions and many of the most common problems. Indicators of Operation When the unit is on the LCD display will show the fan setting, purifier setting, and square footage. If the unit is in sanitizer mode, it will display SANITIZE and the hours and minutes remaining. Troubleshooting What to look for first. 1. I have plugged in the unit, turned on the main power switch, pressed the ON button on the remote or the unit and nothing happens.whats wrong Make sure the power cord is inserted completely into the receptacle on the back of the unit. Make sure the electrical outlet is capable of providing power to the unit.
